

PORT FOLIO

PAUL LESTER IVAN
GRAPHIC DESIGNER / LAYOUT ARTIST

PAUL LESTER IVAN N. MALANA

A graphic designer and layout artist with extensive freelance experience in brand development. I possess a proven ability to create visually compelling and strategically sound marketing materials for both print and digital platforms. My work emphasizes consistent brand messaging and impactful visual communication. I am currently seeking a challenging role that offers opportunities for professional growth.

EXPERIENCE

**Public Information Officer - College of Information
Technology Student Council**

Graphic / Layout Artist & Social Media Manager (2023- 2024)

Freelancer

Graphic and Layout Artist (2023 - 2025)

SOFTWARES

**ABOUT
ME**

EDUCATION

CENTRAL BICOL STATE UNIVERSITY OF AGRICULTURE
Bachelor of Science in Information Technology
2021 - 2025

KING THOMAS LEARNING ACADEMY INC.
SHS - Humanities and Social Sciences
2019 - 2021

LUPI-ILIGAN NATIONAL HIGH SCHOOL
Junior High School
2015 - 2019

LUPI CENTRAL SCHOOL
Elementary
2009 - 2015

INTERESTS

Software Development
Publication Materials
Branding / Mockups
Posters / Banners
UI / UX Design

CONTENT

1 Poster / Banner Designs
Created posters and banners for the Student Council organization and freelance clients.

2 Logo / Brand Designs
Developed logos and branding for various personalities and businesses during my free time.

3 Shirts Layout / Mock ups
Designed shirt layouts for organizations, gaming-themed apparel, and other projects. This is one of my favorite aspects of design – seeing my creations become tangible products.

4 Software Development
Developed a mobile application for my capstone project, which earned awards for Best in App Development, Best Capstone Project, and Best Capstone Paper. The app assists farmers in monitoring and identifying NPK soil nutrients and recommending fertilizer amounts per kilogram, integrating IoT devices.

RAISING CHILDREN IN DIGITAL AGE

Exploring the challenges of raising children in the digital age and provides solutions to help families manage technology wisely.

Technology has become a huge part of everyday life, and children today are growing up in a world filled with smartphones, social media, video games, and the internet. While technology brings many benefits, such as easy access to information and better communication, excessive or unregulated screen time can negatively impact children's health, behavior, and development. Many parents struggle to find a balance between allowing technology for learning and entertainment while also ensuring their children develop healthy habits and social skills.

THE ROLE OF TECHNOLOGY IN CHILDREN'S LIVES

Technology offers children significant benefits in education, creativity, and communication, providing access to online learning, global connections, and diverse creative tools. However, excessive screen time poses serious risks, including shortened attention spans, sleep disturbances, social isolation, physical inactivity, obesity, and exposure to harmful online content and cyberbullying. Therefore, establishing healthy technology boundaries through parental guidance and open communication is crucial for maximizing the benefits while protecting children's well-being.

A RESPONSIBLE AND MINDFUL APPROACH TO TECHNOLOGY USE IS CRUCIAL FOR FOSTERING A HEALTHY AND WELL-ROUNDED DEVELOPMENT IN CHILDREN.

RECENT TRENDS

SCREEN TIME ADDICTION:

Excessive device use can lead to addiction-like behaviors, causing irritability when devices are taken away, prioritization of screen time over other activities, and difficulty focusing on real-world tasks.

SOLUTIONS: include setting age-appropriate daily screen time limits (e.g., the American Academy of Pediatrics recommends no more than 1 hour for children aged 2-5), using screen usage monitoring and restriction apps, and encouraging non-digital hobbies.

EXPOSURE TO INAPPROPRIATE CONTENT:

The internet's unfettered nature exposes children to harmful content like violence, pornography, and misinformation, potentially influencing their thoughts and behavior.

SOLUTIONS: involve enabling parental controls, teaching children digital literacy to identify safe and unsafe online content, and keeping internet use in common areas.

CYBERBULLYING AND ONLINE SAFETY RISKS:

Social media and online games expose children to cyberbullying and online predators, leading to harassment, threats, and negative mental health impacts.

SOLUTIONS: include teaching children never to share personal information online, fostering open communication about online concerns, and monitoring their online interactions and friend lists.

IMPACT ON SOCIAL SKILLS AND FAMILY RELATIONSHIPS:

Excessive screen time weakens family bonds and hinders the development of social skills, leading to difficulties with face-to-face communication and a preference for virtual interactions.

SOLUTIONS: include creating tech-free zones during meals and family time, scheduling screen-free family activities, and encouraging participation in outdoor activities and social events.

CHALLENGES OF PARENTING IN A DIGITAL WORLD

Raising children in the digital age comes with many challenges, but it is possible to create a balanced and safe environment. Technology is a powerful tool that, when used responsibly, can enhance education, creativity, and relationships. Parents and guardians play a vital role in guiding children to make smart, safe, and healthy choices in their digital lives.

By setting boundaries, providing real-world interactions, and maintaining open communication, families can embrace technology without letting it take over their lives.

WATER SCARCITY

THE FIGHT FOR CLEAN WATER

Water is essential for life, yet millions of people around the world struggle to access clean and safe water. Water scarcity happens when there is not enough water to meet the needs of people, agriculture, and industries. This crisis is worsened by climate change, pollution, and overuse of water resources. Without action, water shortages could threaten food production, ecosystems, and human survival.

2 MAIN TYPES OF WATER SCARCITY

PHYSICAL WATER SCARCITY

This happens when there is not enough natural water in an area due to dry climates, droughts, or climate change.

ECONOMIC WATER SCARCITY

Some areas have enough water, but people cannot access it because of poverty, poor infrastructure, or political unrest.

CAUSES OF WATER SCARCITY

- Climate Change - Rising global temperatures lead to more droughts, reducing the amount of water available in rivers, lakes, and underground sources.
- Overuse of Water - Industries, agriculture, and households use more water than nature can replace, leading to shortages.

DRINKING WATER

EFFECTS OF WATER SCARCITY

- HEALTH PROBLEMS** - Lack of clean water leads to diseases like cholera, dysentery, and dehydration, affecting millions of people, especially in poor countries.
- FOOD SHORTAGES** - Limited water supply hampers crop and stock raising. Water scarcity can cause lower food production and higher prices.
- ENVIRONMENTAL DAMAGE** - Rivers, lakes, and wetlands dry up, destroying habitats for fish, plants, and wildlife.
- ECONOMIC LOSSES** - Businesses and industries that rely on water, such as tourism, face losses and closures, causing job losses and poverty.
- CONFLICTS OVER WATER** - In some places, water shortages lead to disputes between countries and communities, increasing political tensions.

How can WE help?

- SAVE WATER AT HOME** - Take shorter showers, use a broom instead of a hose, and fix leaks to prevent water waste.
- SUPPORT CLEAN WATER PROJECTS** - Donate to or volunteer for organizations that build wells and provide clean water in water-scarce regions.
- ADVOCATE FOR WATER PROTECTION** - Join efforts to push for better water policies, conservation programs, and pollution control.
- CHOOSE SUSTAINABLE PRODUCTS** - Buy products that use less water in their production, like eco-friendly clothing and food.
- Water is a precious and limited resource.** If we do not take action now, future generations will struggle with even worse water shortages. By reducing waste, protecting natural water sources, and supporting better water policies, we can ensure that clean water is available for everyone. Every drop counts - let's fight for a future with clean water for all!

FAIR ELECTION

FOR EVERYONE

Voting is a fundamental right in a democracy. However, many people face difficulties when trying to vote due to unfair laws, complicated processes, and intentional restrictions. These issues make it harder for some communities to participate in elections, leading to an unequal and unjust system. Electoral reform is necessary to ensure that every citizen has an equal chance to vote, and that elections are fair, secure, and accessible to all.

ELECTORAL REFORM

Electoral reform refers to changes made in voting laws and election systems to improve fairness and representation. It aims to remove barriers that prevent people from voting and make sure that elections truly reflect the will of the people.

For example, some countries have introduced automatic voter registration, where eligible citizens are registered to vote when they turn a certain age. Others have implemented ranked-choice voting, which allows voters to select multiple candidates in order of preference, making elections more representative.

Electoral reform is essential to strengthen democracy and ensure that every vote carries equal weight. Without fair election systems, governments may not truly represent the people they serve.

DRINKING WATER

What is Voter Suppression?

Voter suppression refers to actions or policies that make it harder for certain groups, especially minorities, the elderly, and low-income individuals, to vote, often creating an unfair advantage for specific politicians or parties. Common methods include strict voter ID laws that prevent many, particularly the elderly or rural residents, from voting; removing voter names from lists without their knowledge, which leads to disenfranchisement; fewer polling stations in low-income or minority areas, resulting in long lines and discouraging voter turnout; unfair districting or gerrymandering that manipulates voting boundaries to favor one party, diminishing the power of certain communities; and restricting early and mail voting options that many rely on due to work or health limitations. These tactics undermine democracy by preventing full and fair participation, making elections less reflective of the people's true will.

FAIR ELECTIONS

ensure democracy by giving every citizen an equal voice, holding leaders accountable, and preventing corruption. When elections are open and transparent, governments serve the people better, and no group holds unfair power. Protecting fair elections safeguards democracy and ensures leaders reflect the true will of the people.

FIXING THE ELECTORAL SYSTEM REQUIRES EFFORTS FROM BOTH GOVERNMENTS AND CITIZENS TO ENSURE FAIRNESS, ACCESSIBILITY, AND TRANSPARENCY.

Voting should be made easy by increasing polling places, enabling online or automatic registration, and removing unnecessary barriers. Unfair districting should be prevented by having independent commissions, not politicians, set voting boundaries. Election security must be improved with paper backups for voting machines and independent oversight of vote counting. The influence of money in politics should be limited through stronger campaign finance laws to prevent wealthy individuals and corporations from controlling elections. Lastly, educating people about their voting rights is essential, as many are unaware of their rights and how the system works, ensuring greater participation and a stronger democracy.

INFLATION

THE RISING COST OF LIVING

Have you noticed that the prices of food, fuel, and basic necessities keep going up? That's inflation—the steady increase in the cost of goods and services over time. While some inflation is normal, too much inflation reduces the value of money, making it harder for people to afford daily essentials. Inflation affects everyone, from ordinary workers to business owners, and even entire economies. Understanding inflation is important because it helps us prepare for financial challenges and find ways to manage our money.

WHY INFLATION HAPPEN?

Rising prices affect everyone. Inflation happens when the cost of goods and services increases across the board. Several factors contribute, including strong consumer demand, increasing production costs (like wages or raw materials), an oversupply of money, global events impacting supply chains, and government economic policies.

WHAT IS INFLATION?

Inflation happens when prices rise, and the purchasing power of money decreases. This means that over time, the same amount of money buys fewer goods and services.

For example, in 2020, \$100 might have bought a full meal at a restaurant. In 2023, the same \$100 may only be enough for a snack.

This erosion of purchasing power is driven by various factors, including increased demand, rising production costs, an excessive money supply, global events disrupting supply chains, and government policies. Inflation is measured using the Consumer Price Index (CPI), which tracks the price changes of essential goods and services, such as food, transportation, housing, and healthcare.

POSITIVE EFFECT OF INFLATION

If controlled, moderate inflation can offer some positive effects: it encourages spending and investment, which can fuel economic growth; it helps governments manage their debts by reducing the real value of loans; and it can prevent deflation, which is harmful to the economy.

DRINKING WATER

How CAN WE MANAGE INFLATION?

Government Solutions:

- 1. HIGHER COST OF LIVING** - Families struggle to afford basic needs like food, rent, and transportation.
- 2. LOWER PURCHASING POWER** - People's salaries and savings lose value, making it harder to maintain their lifestyle.
- 3. RISING INTEREST RATES** - Banks increase loan and mortgage rates, making it more expensive to borrow money for houses, cars, or businesses.
- 4. UNSTABLE ECONOMY** - Uncontrolled, businesses struggle, unemployment rises, and economic growth slows down.

Individuals can also mitigate inflation's impact. This includes creating and sticking to a budget, prioritizing essential spending, investing in assets that tend to hold value during inflation (such as real estate, stocks, or gold), seeking additional income streams, and proactively saving and planning for long-term financial security.

What can INDIVIDUALS DO?

Being financially aware and prepared can help us survive and thrive—even in times of rising costs.

CULTURAL ISSUES

PRESERVING TRADITIONS IN A CHANGING WORLD

Culture is what makes every community unique. It includes language, customs, beliefs, art, and traditions passed down from generation to generation. However, in today's fast-changing world, many cultures are at risk of disappearing due to globalization, modernization, and social conflicts. Cultural issues affect identity, heritage, and the way societies connect with their past. If we do not protect cultural diversity, we may lose valuable traditions, languages, and knowledge forever.

WHAT ARE CULTURAL ISSUES?

Cultural issues arise when traditions, languages, and customs are threatened, disrespected, or forgotten. These challenges affect indigenous communities, minority groups, and even entire nations, often stemming from colonization, discrimination, globalization, and a lack of support for cultural preservation. The erosion of cultural heritage frequently leads to a loss of identity, impacting individuals' sense of belonging and contributing to social fragmentation. Conflicts over land rights, resource access, and the imposition of external values frequently exacerbate existing cultural tensions and inequalities. Effective cultural preservation efforts require understanding and respect.

SOME MAJOR CULTURAL ISSUES

THE LOSS OF INDIGENOUS LANGUAGES

is a significant issue, as younger generations are not learning them. This is largely due to schools prioritizing dominant languages, making native languages seem less useful. As a result, children grow up speaking global languages instead of their mother tongue, and urbanization separates people from their traditional communities, making language harder to pass down.

DISRESPECT FOR CULTURAL PRACTICES AND TRADITIONS

is another problem. Many traditional practices are mocked, ignored, or banned due to misunderstandings or discrimination. For instance, religious and spiritual rituals are sometimes seen as outdated or superstitious, and traditional clothing and hairstyles are criticized or not allowed in schools and workplaces.

CULTURAL APPROPRIATION

is also harmful. When people borrow cultural elements without understanding or respecting their meaning, it reduces deep traditions to fashion trends or entertainment. It disregards the original communities that created these traditions and profits from culture without giving credit to the people who own it.

DISCRIMINATION AGAINST CULTURAL MINORITIES

is a widespread issue. Many ethnic and cultural groups face discrimination because of their skin color, racial background, traditional clothing, or religious beliefs. This can lead to social exclusion, fewer job opportunities, and loss of cultural pride.

THE IMPACT OF GLOBALIZATION ON LOCAL CULTURES

is another concern. Globalization connects the world but causes many local cultures to disappear under the influence of dominant global cultures. Traditional foods, music, and customs are replaced by Western influences, and large businesses take over local industries, making traditional crafts and arts less profitable.

Preserving and respecting cultures requires a collective effort. One way to start is by supporting indigenous and minority communities. This can be done by buying from local artisans, listening to their stories, and respecting their cultural rights. Additionally, learning and using native languages can help keep endangered languages alive, and encouraging younger generations to speak and teach these languages can ensure their survival.

Ultimately, culture is what makes humanity unique. Without it, the world loses its beauty, traditions, and wisdom. By preserving culture, we ensure that future generations can continue to learn from, appreciate, and build upon the rich cultural heritage that has been passed down to us.

Guidelines & Mechanisms

1. THE SLOGAN MAKING CONTEST IS OPEN TO ALL COLLEGES OF CENTRAL BICOL STATE UNIVERSITY OF AGRICULTURE - SIPOCOT.
2. EACH COLLEGE MAY HAVE A MAXIMUM OF TWO (2) PARTICIPATING STUDENTS.
3. PARTICIPANTS ARE REQUIRED TO BRING THEIR OWN MATERIALS, WHICH INCLUDE 1/2 CARTOLINA, MARKERS, AND/OR ART MATERIALS: OIL PASTELS/CRAYPAs, INK, MIXED MEDIA, OIL, ACRYLIC, AND WATERCOLOR.
4. THE SLOGAN MUST REVOLVE AROUND THE THEME: "PRIORITIZE YOUR MENTAL HEALTH AND BE YOUR BEST SELF."
5. PARTICIPANTS WILL HAVE A TOTAL OF 2 HOURS TO CREATE THEIR SLOGANS.
6. PARTICIPANTS WILL BE HELD ACCOUNTABLE FOR ANY ISSUES REGARDING THE ORIGINALITY AND AUTHENTICITY OF THEIR ENTRY.
7. JUDGES WILL EVALUATE THE SLOGANS BASED ON CREATIVITY, ORIGINALITY, NEATNESS, RELEVANCE TO THE THEME, AND OVERALL IMPACT.
8. WINNERS WILL BE ANNOUNCED IN THE AFTERNOON.
9. THE WINNERS WILL RECEIVE THE FOLLOWING PRIZES:
1ST PLACE - 500
2ND PLACE - 400
3RD PLACE - 300

did you know?

The Philippines is the first country in Asia to hold a Pride Parade. On June 26, 1994, more than 30 queer advocates and the Metropolitan Community Church Philippines, organized a demonstration in Quezon City in commemoration of the 25th anniversary of the Stone Wall Riots. It was dubbed as the "Stone Wall Manila." Yet, almost three decades after the Stone Wall Manila, we ask ourselves, "has there been substantial change for the Filipino LGBTQ+ in the past years?"

LOCAL PLANT PESTS & DISEASES

AGRI1 - ORGANIC AGRICULTURE

BLIGHT

LOCAL NAME: Fire blight, Late blight

PLANT HOST: A wide range of fruits and vegetables such as tomatoes, potatoes, and other nightshades.

CAUSAL ORGANISM: Various fungal and bacterial pathogens depending on the specific blight.

EFFECTS: Causes browning and withering of leaves, flowers, and shoots, often forming "shepherd's crook".

PREVENTION: Planting cultivars known to be resistant to blight is the most effective way to prevent the disease and minimize the risk of infection.

CONTROL: Remove and destroy infected plant debris promptly to prevent the overwintering of pathogens and reduce the risk of future infections.

POWDERY MILDEW

PLANT HOST: Many plants including roses, cucumbers, squash, grapes, sunflower, and phlox.

CAUSAL ORGANISM: Various fungal pathogens belonging to the genera Erysiphe, Podosphaera, Sphaerotheca, and Uncinula.

EFFECTS: Powdery mildew forms a white, powdery coating on leaves, stems, and fruits. It can weaken the plant, reduce photosynthesis, stunt growth, and cause leaf drop.

PREVENTION: Select cultivars known to be resistant to powdery mildew. This is the most effective way to minimize the risk of infection.

CONTROL: Improve airflow around plants by spacing them properly and pruning to allow air to move freely. Reducing humidity, which powdery mildew thrives in.

Protecting your plants from pests and diseases is essential for a thriving garden. Understanding the specific threats to your local area is crucial for choosing the right control methods. Prevention is key, with practices like selecting resistant varieties, maintaining good sanitation, and providing proper care minimizing the risk of problems. Organic control methods are also highly effective, minimizing the use of harmful chemicals. Remember, a proactive approach, including regular monitoring, early intervention, and seeking advice from local experts, will go a long way in ensuring your plants thrive and continue to provide you with beauty, delicious fruits, and healthy vegetables.

LOCAL PLANT PESTS & DISEASES

AGRI1 - ORGANIC AGRICULTURE

CUTWORMS

Noctua pronuba / Turnip Moth Caterpillar

PLANT HOST: Many crops including corn, cotton, soybeans, and vegetables like tomatoes and peppers.

PREVENTION: Rotate crops, till the soil deeply, and use row covers to prevent adult moths from laying eggs.

CONTROL: Monitor and destroy cutworms, use beneficial insects like parasitic wasps, and apply Bacillus thuringiensis (Bt), a naturally occurring bacterium that is toxic to caterpillars.

WHITE FLIES

Aleyrodidae / White Flies

PLANT HOST: Many plants, including poinsettias, citrus, and vegetables like squash and beans.

PREVENTION: Choose resistant plant varieties, maintain good garden hygiene, and use yellow sticky traps to monitor populations.

CONTROL: Encourage beneficial insects like ladybugs and lacewings, wash off whiteflies with a strong spray of water, and use insecticidal soap or neem oil.

LEAF MINER

Urliomyza sativae / Ahas-ahas

PLANT HOST: Various plants including tomatoes, peppers, beans, and hostas.

PREVENTION: Remove and destroy infected leaves promptly, and use row covers to protect plants.

CONTROL: Encourage beneficial insects like parasitic wasps, and use insecticidal soap or neem oil.

SoilRxpert: A Mobile Application for Soil Health Monitoring

SoilRxpert is a mobile app using IoT sensors to monitor ginger soil health, providing real-time data on moisture and nutrients (NPK) to farmers via a user-friendly interface.

This improves decision-making, promotes sustainable practices, and increases crop yields by overcoming limitations of traditional soil testing.

The background of the image is a light blue, textured surface resembling crumpled paper. Scattered across this surface are several colorful, semi-transparent icons of popular software applications: Adobe Photoshop (Ps), Adobe Illustrator (Ai), Adobe InDesign (Id), Adobe Lightroom (Lr), and Microsoft Word (W). On the left and right sides of the image, there are vertical black rulers with white markings and numbers, adding a technical or design-oriented feel to the composition.

As a freelance graphic designer with a supporting IT background, my portfolio showcases a diverse skillset honed through 3 years of experience. I excel in creating visually compelling and effective designs, ranging from Publication Materials, Logo / Branding, shirt design web and software development, while leveraging my IT knowledge to ensure seamless digital implementation and optimization. I am eager to contribute my expertise to a dynamic team and actively seek opportunities for professional growth that allow me to fully utilize my creative and technical capabilities within the graphic design field.
